Understanding navigation in MVC

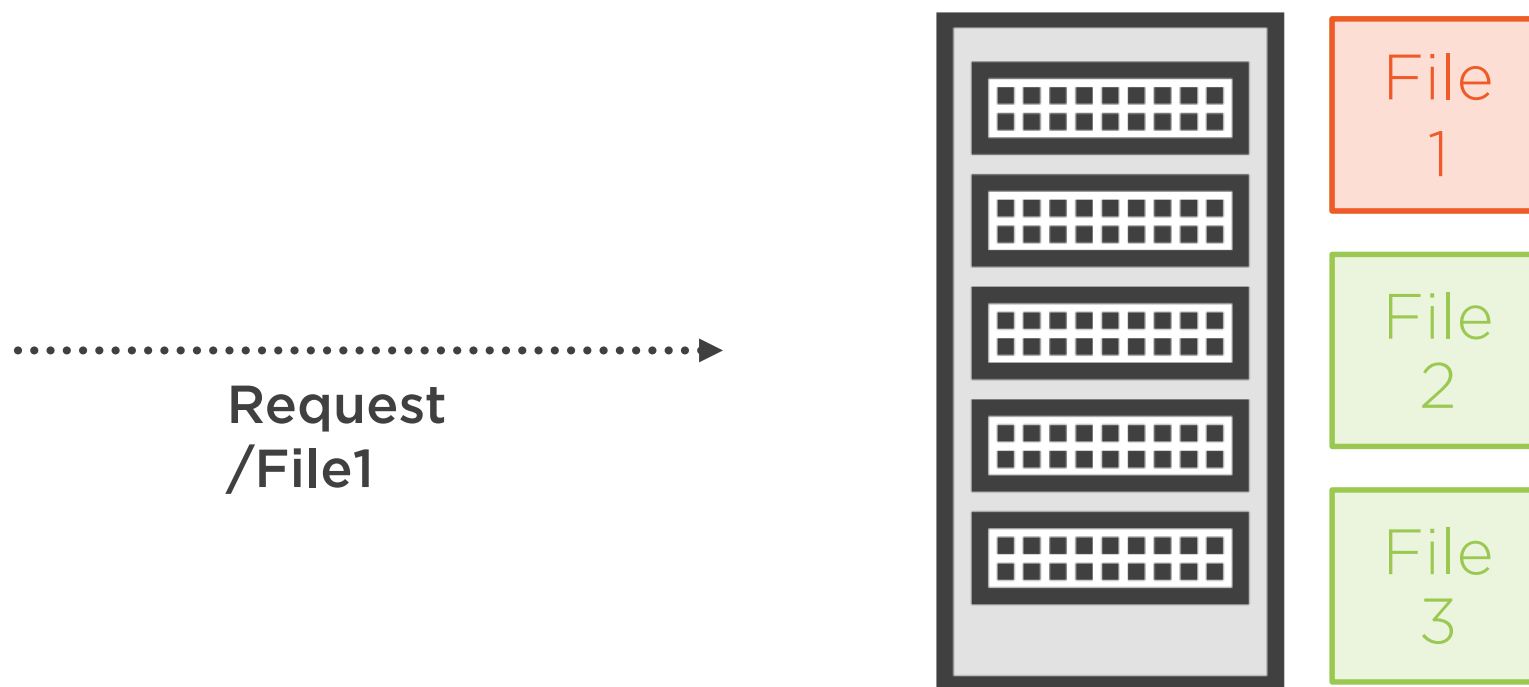

Adding navigation

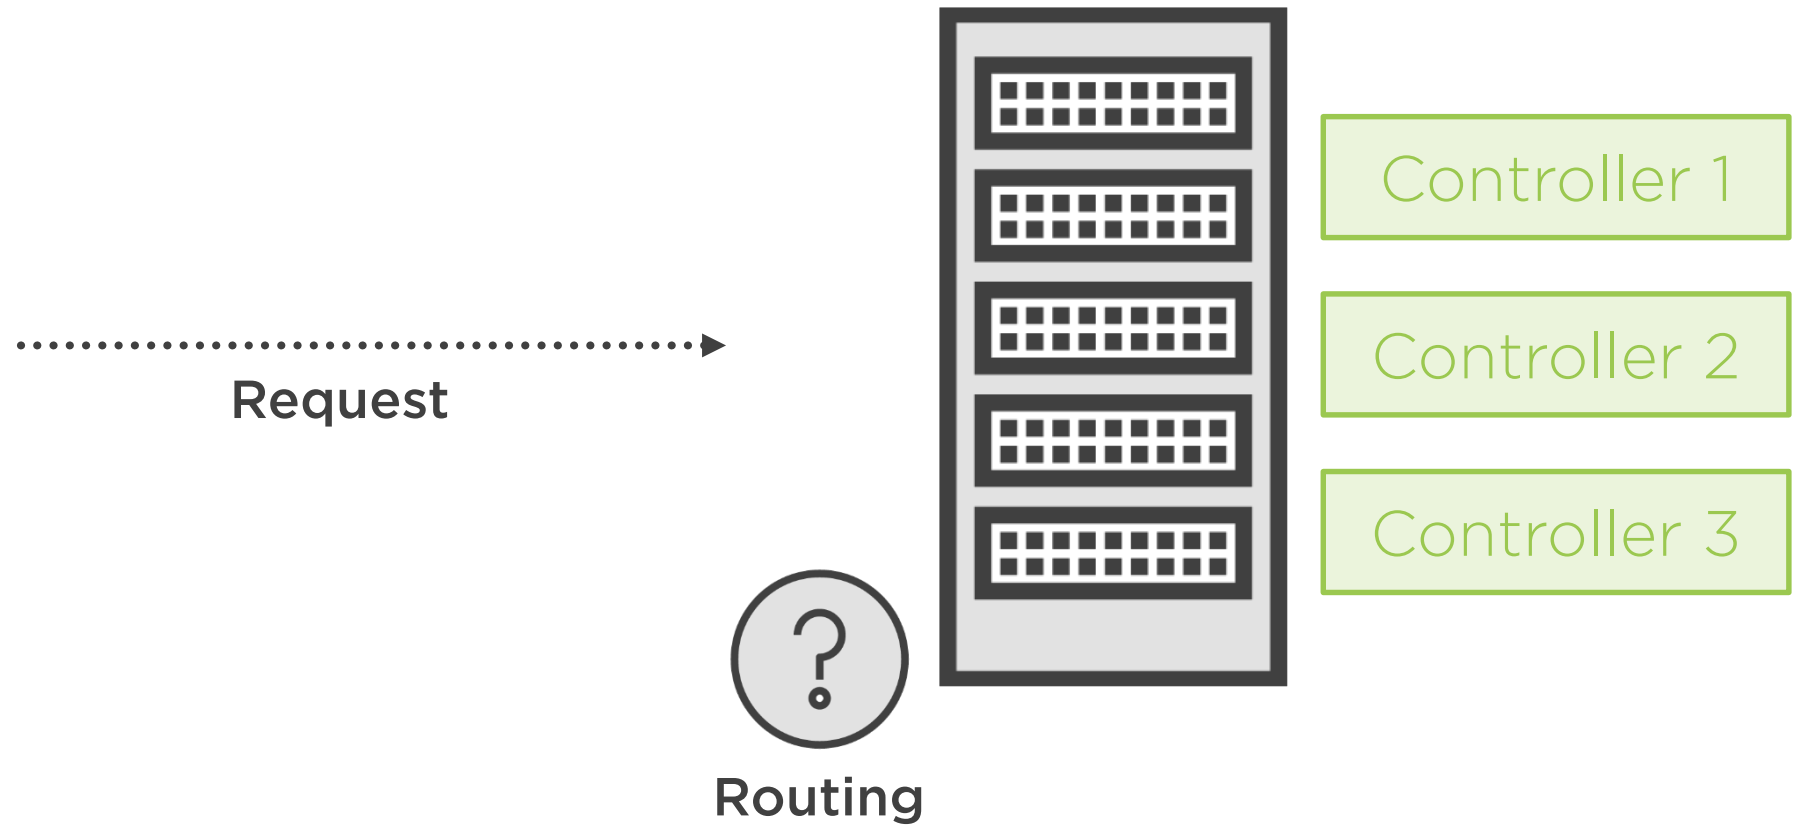

Understanding Navigation in MVC

Serving Files

Handling Requests in ASP.NET Core MVC

Patterns and Routes

`http://www.bethanyspieshop.com/Pie/List`

↑
Controller ↑
Action

`{Controller}/{Action}`

Routing to the Action Method

```
public class PieController : Controller
{
    public ActionResult List()
    {
        return View();
    }
}
```

Working with Segments

`http://www.bethanyspieshop.com/Pie/Details/1`

Controller

Action

Value

`{Controller}/{Action}/{id}`

Passing a Value

```
public class PieController : Controller
{
    public ViewResult Details(int id)
    {
        //Do something
    }
}
```

```
app.UseMvcWithDefaultRoute();
```

```
//Maps to {controller=Home}/{action=Index}/{id?}
```

Default Route

```
app.UseMvc(routes =>
{
    routes.MapRoute(
        name: "default",
        template: "{controller=Home}/{action=Index}/{id?}");
});
```

Defining Routes

```
app.UseMvc(routes =>
{
    routes.MapRoute(
        name: "default",
        template: "{controller=Home}/{action=Index}/{id?}");
});
```

Route Defaults

- Will match www.bethanyspieshop.com

```
app.UseMvc(routes =>
{
    routes.MapRoute(
        name: "default",
        template: "{controller=Home}/{action=Index}/{id?}");
});
```

Optional Segments

- Will match
 - www.bethanyspieshop.com/Pie/List
 - www.bethanyspieshop.com/Pie/Details/1

Adding Navigation

Tag Helpers

Server-side

Trigger code execution

Built-in or custom

Replace HTML Helpers

```
<a asp-controller="Pie" asp-action="List">  
  View Pie List  
</a>
```

Tag Helpers

```
<a href="/Pie/List">View Pie List</a>
```

Resulting HTML

Tag Helpers

asp-controller

asp-action

asp-route-*

asp-route

Demo

Adding Navigation

Summary

**Routing matches incoming request URI
with pattern**
